

# Automated General Surgery Operative Logbook

(Integrated with Learning Agreement, and ARCP)

Form 13.5.3.2

# Automated General Surgery Operative Logbook

**At the commencement of the final shift in phase 2:**

Select one of the seven special interest **options** and add to your logbook, following guidance from your AED.

### The Learning Agreement (LA)

- Trainee **progress is monitored primarily** by the trainee's **AES** through **learning agreement meetings** with the trainee
- The **LA** must be reviewed, along with **other portfolio evidence** of training such as **WBAs**, the **logbook** and the **formative Trainer Report (TR)**, including the **trainee's self-assessment**.
- **The final TR**, together with **other portfolio evidence**, feeds into the **AES report** which in turn feeds into the **Annual Review of Competence Progression (ARCP)**.
- The **ARCP** uses all presented evidence to make the **final decision** about whether a trainee can progress to the **next level or complete training** in each **12-month** training placement.
- At the end of each **training phase** there is a **critical progression point (CPP)** to make the **final decision** about whether a trainee can progress to the **next phase of training or complete training**.

## DOPS & PBA **competency levels**

Competency level of **performed index procedures** range between 2 to 4

Level 1a	Able to assist with guidance (was not familiar with all steps of procedure)
Level 1b	Able to assist without guidance (knew all steps of procedure and anticipated next move)
<b>Level 2a</b>	<b>Guidance required for most/all the procedure (or part performed)</b>
<b>Level 2b</b>	<b>Guidance or intervention required for key steps only</b>
<b>Level 3a</b>	<b>Procedure is performed with minimal guidance or intervention (needed occasional help)</b>
<b>Level 3b</b>	<b>Procedure performed competently without guidance or intervention but lacked confidence</b>
<b>Level 4a</b>	<b>Procedure performed confidently to a high standard without any guidance or intervention</b>
<b>Level 4b</b>	<b>As 4a and was able to anticipate, avoid and/or deal with common problems/complications</b>

## The logbook **supervision levels**

**For non-index procedures:** The cumulative number include assisted cases (**A + S-TS + S-TU + P + T**)

**For index procedures:** The indicative number of **performed** cases does not include Assisted cases (**S-TS + S-TU + P + T**)

<b>Level 1</b>	<b>Assisted (A)</b>
<b>Level 2</b>	<b>Supervised – trainer scrubbed (S-TS)</b>
<b>Level 3</b>	<b>Supervised – trainer unscrubbed (S-TU)</b>
<b>Level 4</b>	<b>Performed (P) or Training more junior trainee (T)</b>

### Mandatory WBAs

- WBAs are **only mandatory** for the assessment of the **basic critical skills** in core surgical training and **specialty critical conditions and index procedures** in specialty training.
- Other than that, WBAs are **optional** and trainees, therefore, **do not** need to use WBAs to evidence their learning **against each syllabus topic**.
- Aside from the mandatory WBAs, no minimum number of WBAs is specified by this curriculum

### Optional WBAs

- Trainees may:
  - agree with their AES to complete WBAs in areas of interest or **in targeted areas of training (areas of concern)** in their action plans during the Learning Agreement Meetings.

### The Logbook entries

- Each procedure should be entered into your logbook through the **Details Sheet**.
  - **Entry** into the Details Sheet **can be made by either the trainer or the trainee**.
  - When you make the entry, you should show your logbook to your trainer **to confirm** that it is an **accurate entry**.
  - **Only** the Trainer can **validate and save entries** by clicking “**Save**” in the **Details Sheet**.
- After **saving the entry**, its details will **display alongside** the relevant procedure in your logbook, **automatically triggering** the transfer of data to the **Learning Agreement, AES Report, ARCP, and ultimately affecting the trainee’s scoring and allocation**. see **Electronic Assessment System (17.2)**

**Table1: Outputs of the General Surgery curriculum**

The modular structure of the curriculum will permit flexibility to respond to changing service demands. Underpinning this is a commonality of training (**mandatory modules for all trainees**). In addition, the trainees will spend up to one of the indicative three years of phase 2 gaining **early exposure** to one of the **special interest areas** in General Surgery through an **option module**, as shown in the table, which can be **developed further in phase 3**. On completion of training **all trainees will have** elective general surgical competencies and emergency general surgical knowledge and clinical skills.

Phase 2 (ST1 – ST3)			
Mandatory (click on the module to access its content)			
Module 1	Elective General Surgery	Module 5	Vascular Surgery
Module 2	Emergency General Surgery	Module 6	General Surgery of Childhood
Module 3	Upper GI Surgery ( <b>General</b> )	Module 7	Remote and Rural Surgery
Module 4	Colorectal Surgery ( <b>General</b> )		
Select one of the following seven special interest options (Click on the option to access its modules, then click add to my logbook at the bottom of the modules)			
	Phase 2 (ST3)	Phase 3 (Special Interest Training - SIT)	
	early exposure to one of the special interest areas	First special interest module	Second special interest module
Option 1	Upper GI Surgery ( <b>Special interest</b> )	Oesophagogastric Surgery	Emergency General Surgery
Option 2	Upper GI Surgery ( <b>Special interest</b> )	Hepatopancreaticobiliary Surgery	Emergency General Surgery
Option 3	Colorectal Surgery ( <b>Special interest</b> )	Colorectal Surgery	Emergency General Surgery
Option 4	Trauma Surgery	Trauma Surgery	Emergency General Surgery
Option 5	Endocrine Surgery	Endocrine Surgery	Emergency General Surgery
Option 6	Renal Transplant	Renal Transplant	Emergency General Surgery
Option 7	Breast Surgery (module 1)	Oncoplastic Breast Surgery (module 2A)	Reconstruction Breast Surgery (module 2B)

### 1.1.3.3. Operative Procedure Details Sheet

**(separate sheet for each procedure)**

**Section 1: Cumulative number** Should be completed for every procedure (index and non-index procedures)

**Section 2: PBAs** Should only be completed for the index procedures.

**(Entries into your logbook will be through this details sheet)**

**When the Trainer click “Save” the entries will be displayed alongside the procedure in your logbook**

Procedure Name		Index procedure	Yes		No	
Target supervision or PBA competency level at end of each phase		Phase 2		Phase 3		
<b>Trainer can download</b> a new <b>(PBA)</b> by selecting the required index procedure from this drop box			Select index procedure			

## Section 1: Cumulative number of cases (Tick the supervision level)

**For Non-index Procedures: Assisted cases included (A + S-TS + S-TU + P + T)**

**For Index Procedures: Assisted cases excluded (S-TS + S-TU + P + T)**

[illegible]

CUMULATIVE Non-index Proc. (Include Assisted)								
CUMULATIVE Index Procedure (Exclude Assisted)								
Section 2: PBAs for Index Procedure (Write PBA competence level achieved)								
Date	Phase 2						Phase 3	
	ST1		ST2		ST3		SIT	
	Shift 1	Shift 2	Shift 3	Shift 4	Shift 5	Shift 6	Shift 7	Shift 8
	PBA level 2 to 4		PBA level 2 to 4		PBA level 2 to 4		PBA level 2 to 4	
Dates of 3 PBAs completed to the level shown at end of phase 2 & 3.								
Phase 2				Phase 3				
1 <sup>st</sup> PBA	2 <sup>nd</sup> PBA	3 <sup>rd</sup> PBA		1 <sup>st</sup> PBA	2 <sup>nd</sup> PBA	3 <sup>rd</sup> PBA		
<p>➤ Every PBA completed to the level shown at end of phase 2 &amp; 3 will be added in the “3 PBAs” box in the logbook</p> <p>➤ The “3 PBAs” box color will change to green When the target 3 PBAs are completed.</p>								

“Save” after each entry (the total of each level, last level achieved, and cumulative No. will be displayed in the logbook)

1.1.3.4. Phase 2: Mandatory Modules												
Total Index proc.	INDEX PROCEDURES		Phase 2 Progression							Minimum Phase 2 Targets "3 PBAs" box change green if achieved		
			Total of each level				Cum. No.	Last PBA level (2-4)				
			A	S-TS	S-TU	P or T		level	Shift No.	PBA level	Indic No.	3 PBAs
MODULE 1: <b>ELECTIVE GENERAL SURGERY</b>												
1	1	Inguinal hernia (adult and paediatric)								4	50	
2	2	Repair primary abdominal wall hernias (adult and paediatric)								4	—	
3	3	Repair of incisional or recurrent hernias								4	—	
MODULE 2: <b>EMERGENCY GENERAL SURGERY</b>												
4	4	Appendicectomy - open and laparoscopic (adult, and paediatric)								4	60	
5	5	Emergency laparotomy								3	45	
6	6	Cholecystectomy – lap / open (emergency and elective)								3	40	
7	7	Partial gastrectomy (emergency and elective)								3	—	
8	8	Segmental colectomy (emergency and elective)								3	15	
9	9	Hartmann's procedure (emergency and elective)								3	—	
MODULE 4: <b>COLORECTAL</b> (General)												

10	10	Haemorrhoidectomy - operative treatments							4	35	
11	11	Fistula-in-ano (including lay open, placement and choice of seton)							3	10	
12	12	Rectum - high anterior resection							3	15	

**Progression summary (for learning agreement, ARCP & end of phase 2 CPP)**

Total number of the performed index procedures										
Total number of index procedures with 3 PBAs completed to the target level shown										
The % of the index procedures with 3 completed PBAs										
100 % (all the index procedures) – date box changes to green					Proceed to phase 3		Date			
< 100 % - an area of concern for remedial action - date box change to red					Repeat the shift		Date			
100 % achieved in the repeated shift – date box change to green					Proceed to phase 3		Date			
Total non-index Proc.	NON - INDEX PROCEDURES				Phase 2 Progression			Minimum Phase 2 Target Levels		
					Total of each level				Cumuli No.	Last sup. level (1-4)
					A (1)	S-TS (2)	S-TU (3)			
								Box changes green if sup. level achieved		

**MODULE 1: ELECTIVE GENERAL SURGERY**

1	1	Punch biopsy							4
2	2	Excision of skin and subcutaneous lesions							4
3	3	Evacuation of haematoma							4
4	4	Biopsy - FNA Breast, neck, subcutaneous							4
5	5	Lymph node biopsy-groin, axilla and abdomen							4
6	6	Cervical lymph node biopsy							4

7	7	Insertion of nasogastric tube and confirmation of position							4
<b>MODULE 2: EMERGENCY GENERAL SURGERY</b>									
8	1	Drainage of superficial sepsis							4
9	2	Radical excisional surgery of gas gangrene and necrotizing infections							3
10	3	Aspiration of breast abscess							4
11	4	Open drainage of breast abscess and/or debridement of soft tissue necrosis							4
12	5	Removal of infected breast implant							4
13	6	Repair any obstructed or strangulated abdominal hernia, including bowel resection							3
14	7	Operation for testicular torsion, adult and paediatric							4
15	8	Laparotomy / laparoscopy and damage limitation surgery							3
16	9	Salvage surgery e.g. packing							3
17	10	Wash out by laparoscopy/laparotomy							3
18	11	Laparotomy and division of adhesions							3
19	12	Small bowel resection							3
20	13	Gastrotomy + non-resectional treatment - histology							3
21	14	Operative management of perforated viscus including primary closure, resection, and stoma formation							4
22	15	Formation of stoma							3
23	16	Re-laparotomy for post-operative complication including damage control, bleeding, and anastomotic leak							2
24	17	Indications for and techniques for laparostomy / open abdomen							2

25	18	Formation of feeding enterostomy (open / lap)							2
26	19	Colon-primary repair							3
27	20	Cholecystostomy							3
28	21	EUA, rigid sigmoidoscopy, drain perianal haematoma							4
29	22	Insertion of flatus tube							4
30	23	Chest drain insertion							4
31	24	Operative management of visceral injury including splenic conservation, bowel resection, debridement and formation of stoma were indicated							3
32	25	Splenectomy							3
33	26	Cryothyroidotomy							3
34	27	Wound debridement and lavage							3
35	28	Fasciotomy – Lower leg							2
36	29	Application of dressings including Topical Negative Pressure Dressings							3
37	30	Vascular control with compression							4
MODULE 3: UPPER GI (General)									
38	1	Laparoscopy treatment of achalasia							3
39	2	Laparoscopic access in the morbidly obese							2
40	3	Aspiration of lap band port							2
41	4	General Surgery for the super morbidly obese patient							3
42	5	Gastrotomy + non-resectional treatment - histology							4
43	6	Gastroenterostomy							4

44	7	Exploration CBD							2
45	8	Salvage liver surgery e.g. packing							3
MODULE 4: <b>COLORECTAL</b> (General)									
46	1	Pilonidal sinus-lay open							4
47	2	Pilonidal sinus-excision + suture							4
48	3	Pilonidal sinus-graft or flap							2
49	4	Haemorrhoids - Outpatient treatment							4
50	5	Lateral sphincterotomy							4
51	6	Anal skin tags/warts-excision							4
52	7	Sigmoidoscopy-rigid							4
53	8	Hartmann's reversal							3
54	9	Colectomy-total+ileostomy							3
55	10	Colectomy-total+ileorectal anastomosis							3
56	11	Rectum-panproctocolectomy+ileostomy							2
57	12	Ileoanal anastomosis+creation of pouch							2
58	13	Crohn's-ileocaecectomy							2
59	14	Strictureplasty-Crohn's							1
60	15	En-bloc resections of adjacent organs							3
61	16	Extended resections to include total abdominal colectomy							3
62	17	Per anal excision of rectal lesion							1
63	18	Rectum - low anterior resection +/- coloanal anastomosis							1
64	19	Rectum - AP excision (including ELAPE)							1
65	20	Anal tumour - local excision							1

66	21	Anal tumour - AP excision							1
67	22	Prolapse-perineal repair							1
68	23	Intestinal fistula operation							1
69	24	Ileostomy-construction							4
70	25	Colostomy-construction							4
71	26	Ileostomy-closure							4
72	27	Colostomy-closure							4
73	28	Colostomy-revision							3
74	29	Ileostomy-revision							3
MODULE 5: <b>VASCULAR</b>									
75	1	Exposure and control of major peripheral arteries							4
76	2	Basic techniques for repair of major peripheral arteries							3
77	3	Shunting							3
MODULE 6: <b>GENERAL SURGERY OF CHILDHOOD</b>									
78	1	Pyloromyotomy							3
79	2	Manual evacuation							4
80	3	Orchidopexy							4
81	4	Circumcision							4
82	5	Hydrocele operation							4
83	6	Suprapubic catheter insertion							4
84	7	Lymph node biopsy							4
85	8	Abscess drainage							4
86	9	Ingrowing toenail operation							4

## MODULE 7: REMOTE AND RURAL

87	1	Craniotomy for supratentorial extradural haematoma							1
88	2	Closed manipulation of nasal bones and septum							1
89	3	Emergency LSCS							1
90	4	Manual removal of retained placenta							1
91	5	Exploration of genital tract, cervical laceration repair							1
92	6	EUA, repair perineal trauma							1
93	7	Evacuation of retained products of conception							1
94	8	Laparoscopic and open salpingectomy for ectopic pregnancy							1
95	9	Diagnostic laparoscopy							2
96	10	Laparoscopy and open oophorectomy for torsion							1
97	11	Nasal cautery							2
98	12	EUA nose							2
99	13	Appropriate nasal packing in a child							2
100	14	Endotracheal intubation							3
101	15	Suturing of pinna							2
102	16	Manipulation under anaesthetic of appropriate fracture							2
103	17	Reduction of dislocations dependent on site							2
104	18	Trigger finger release							2
105	19	Aspiration / injection knee joint							2

106	20	Endoscopic fragmentation of bladder calculi							1
107	21	Open removal bladder calculi							1
108	22	Rigid cystoscopy, retrograde ureterogram, insertion of JJ stent							2
109	23	Bladder neck incision							1
110	24	Percutaneous insertion of suprapubic catheter							2
111	25	Optical urethrotomy							1
112	26	TURP							1
113	27	Flexible Cystoscopy							3
114	28	TRUS & Biopsy							1
115	29	Cystoscopy and biopsy							2
116	30	Cystoscopy and diathermy bladder lesion							1
117	31	Vasectomy							2
<b>Progression summary (for learning agreement, ARCP &amp; end of phase 2 CPP)</b>									
<b>Total number of the entered phase 2 non-index procedures</b>									
<b>Total number of the achieved supervision levels</b>									
<b>The % of the achieved supervision levels</b>									
<b>≥ 80 % (the acceptable breadth of experience) - date box color will change to green</b>						<b>Proceed to phase 3</b>		<b>Date</b>	
<b>&lt; 80 % is an area of concern and need remedial actions - date box will change to red</b>						<b>Repeat the shift</b>		<b>Date</b>	
<b>≥ 80 % achieved in the repeated shift - date box will change to green</b>						<b>Proceed to phase 3</b>		<b>Date</b>

## Colorectal + Emergency General Surgery

[illegible]

7	Fistula - operation for rectovaginal fistula							2	3
8	Anal skin tags/warts-excision							4	4
9	Sigmoidoscopy-rigid							4	4
10	Rectum-operation for trauma							—	3
11	Hartmann's reversal							3	4
12	Colectomy-total+ileostomy							3	4
13	Colectomy-total+ileorectal anastomosis							3	4
14	Rectum-panproctocolectomy+ileostomy							2	4
15	Ileoanal anastomosis+creation of pouch							2	4
16	Crohn's-ileocaecectomy							3	4
17	Strictureplasty-Crohn's							3	4
18	En-bloc resections of adjacent organs							3	4
19	Extended resections to include total abdominal colectomy							3	4
20	Transanal microsurgery							1	3
21	Per anal excision of rectal lesion							3	4
22	Rectum - posterior approach							1	2
23	Rectum - low anterior resection +/- coloanal anastomosis							2	3
24	Rectum - AP excision (including ELAPE)							2	3
25	Posterior pelvic clearance							3	3
26	Pelvic exenteration							2	3
27	Reoperation-pelvic malignancy							2	3
28	Anal tumour - local excision							2	4
29	Anal tumour - AP excision							2	3

47	Drainage of superficial sepsis							4
48	Radical excisional surgery of gas gangrene and necrotising infections							4
49	Aspiration of breast abscess							4
50	Open drainage of breast abscess and/or debridement of soft tissue necrosis							4
51	Removal of infected breast implant							4
52	Repair any obstructed or strangulated abdominal hernia, including bowel resection							4
53	Operation for testicular torsion, adult and paediatric							4
54	Laparotomy / laparoscopy and damage limitation surgery							4
55	Salvage surgery e.g. packing							4
56	Wash out by laparoscopy/laparotomy							4
57	Laparotomy and division of adhesions							4
58	Small bowel resection							4
59	Gastrotomy + non-resectional treatment - histology							4
60	Operative management of perforated viscus including primary closure, resection, and stoma formation							4
61	Formation of stoma							4
62	Re-laparotomy for post-operative complication including damage control, bleeding and anastomotic leak							4
63	Indications for and techniques for laparostomy / open abdomen							4
64	Formation of feeding enterostomy (open / lap)							3
65	Colon-primary repair							4
66	Cholecystostomy							4

67	EUA, rigid sigmoidoscopy, drain perianal haematoma							4
68	Insertion of flatus tube							4
69	Chest drain insertion							4
70	Operative management of visceral injury including splenic conservation, bowel resection, debridement and formation of stoma were indicated							4
71	Splenectomy							4
72	Cryothyroidotomy							3
73	Wound debridement and lavage							4
74	Fasciotomy – Lower leg							2
75	Application of dressings including Topical Negative Pressure Dressings							4
76	Vascular control with compression							4
